

## FIXED INTEREST MONTHLY INCOME FUND

I Inc ISIN: GB00B7GSYN71

Fund Currency: GBP Share Class Currency: GBP

Janus Henderson  
INVESTORS

A unit trust, managed by Henderson Investment Funds Limited.

### Objective and investment policy

#### Objective

The Fund aims to provide a high income.

Performance target: To outperform the IA Sterling Strategic Bond sector average, after the deduction of charges, over any 5 year period.

#### Investment policy

The Fund invests at least 80% of its assets in a global portfolio of bonds of any quality, including high yield (non-investment grade) bonds, issued by governments, companies or any other type of issuer. Where investments are made in assets in currencies other than Sterling, the Fund will seek to hedge at least 80% of those assets back to Sterling to largely remove the risk of currency exchange rate movements.

The Fund may also hold other assets including preference shares, cash and money market instruments.

In certain market conditions, the Fund may invest more than 35% of its assets in government bonds issued by any one body.

The investment manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the IA Sterling Strategic Bond sector average, which is based on a peer group of broadly similar funds, as this forms the basis of the Fund's performance target. The investment manager has complete freedom to choose individual investments for the Fund and to vary allocations between different types of bonds.

#### Strategy

The investment manager aims to build a diverse portfolio of high yielding fixed interest securities to provide a reliable monthly income over the long term with an acceptable level of risk. With no formal index benchmark to follow, but with a strong focus on income generation, the portfolio managers actively respond to economic and market conditions and alter the portfolio to benefit from the best available sources of income in the developed fixed income markets through careful macroeconomic research and company analysis.

**Distribution policy** The Fund offers both accumulation units (units in which net income is retained within the price) and income units (units in which net income is paid out to investors).

**Recommendation** This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch units in the Fund on any business day, as defined in the Fund Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at [www.janushenderson.com](http://www.janushenderson.com).

### Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The unit class appears at 4 out of 7. Classes in higher categories have shown greater and/or more frequent variations in net asset value in the past 5 years than those in lower categories. The lowest category does not mean risk free.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

**Default Risk** An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.

**Interest Rates** When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise. This risk is generally greater the longer the maturity of a bond investment.

**High Yield Bonds** The Fund invests in high yield (non-investment grade) bonds and while these generally offer higher rates of interest than investment grade bonds, they are more speculative and more sensitive to adverse changes in market conditions.

**Derivatives and Leverage** The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

**Currency Hedging** When the Fund, or a hedged share class, seeks to mitigate exchange rate movements of a currency relative to the base currency, the hedging strategy itself may create a positive or negative impact to the value of the Fund due to differences in short-term interest rates between the currencies.

**Liquidity** Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

**Charges to Capital** Some or all of the ongoing charges may be taken from capital, which may erode capital or reduce potential for capital growth.

**Counterparties** The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund. For more information please see the Fund Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

### One-off charges taken before or after you invest\*

Entry Charge	0.00%
Exit Charge	0.00%**

\* The charges shown are maximum figures. In some cases you may pay less.

## Past performance

\*\* Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

### Charges taken from the Fund over a year

Ongoing Charges	0.69%
-----------------	-------

The ongoing charges are based on last year's expenses for the year ending 03 January 2019. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information please see the Fund Prospectus.

The past performance is calculated in GBP.

The Fund was launched in April 1979 and the units were launched in May 2012.

Past performance is not a guide to future performance.

The past performance shown in the chart takes into account all charges except one-off charges.

The Fund does not aim to track the performance of the index.

## Practical information

**Trustee:** NatWest Trustee and Depository Services Limited.

**To obtain more information:** This Key Investor Information Document may not contain all the information you need.

For the last published price of units in the Fund, or to obtain the annual/semi-annual report, please visit [www.janushenderson.com](http://www.janushenderson.com).
