^{^^}The amount of income generated for distribution after deducting all expenses. *The fraction of a fund invested differently to its benchmark. A 100% active share is a fund with no holdings in the benchmark, a 0% active share is a fund identical to the benchmark. **The higher the percentage, the more the fund relies on a smaller number of stocks to generate dividend income. The lower the percentage, the greater the number of stocks contributing to the fund's overall dividend yield. ***The ratio of a company's profits to the amount of dividend it pays to shareholders. A dividend cover of 2 times means the company's profits are twice the amount being paid as a dividend, whilst a company with a dividend cover of 1 times is paying out a dividend equal to all of its net profits.
