1	North America	51.7
2	Europe (ex UK)	26.0
3	Emerging Markets	17.9
4	Developed Asia Pacific	3.0
5	UK	1.0
6	Net Liquid Assets	0.5

Figures may not sum due to rounding.

Private Companies

The portfolio includes 3 private companies, which in aggregate accounted for 1.5% of total assets.

Proposition

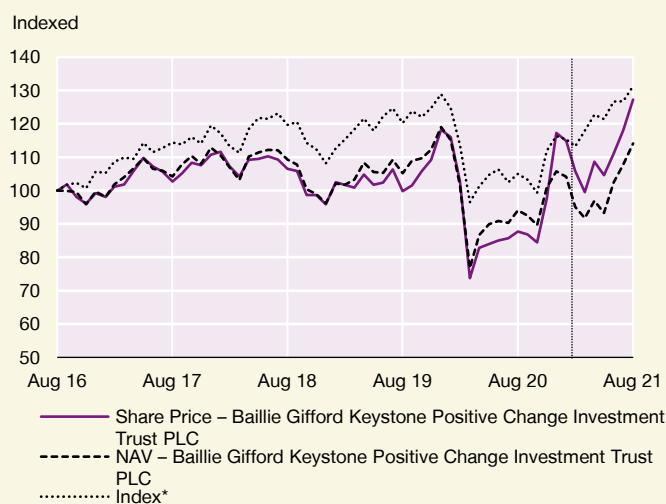

The trust aims to generate long term capital growth with the aim of the NAV total return exceeding that of the MSCI AC World Index in Sterling terms by at least 2% per annum over rolling five year periods; and contribute towards a more sustainable and inclusive world by investing in the equities of companies whose products or services make a positive social or environmental impact. The performance target stated is in no way guaranteed.

Top Ten Holdings

Holdings	% of Total Assets

*MSCI ACWI Index (GBP). Changed from FTSE All Share Index on 10/2/2021.

Data chain-linked from this date to form a single index.

The line at 10 February 2021 represents the appointment of Baillie Gifford & Co Limited as Managers and Company Secretaries.

Prior to this date the Trust had a different investment universe and objective.

Additional Trust Information

Full product details, including a Key Information Document, the possible effect of charges on an investment, are available on request, please see below for contact details.

In this document all references to NAV and NAV performance are calculated with borrowings deducted at fair value. Borrowings at fair value is borrowings (if any) at an estimate of their market worth.

All performance figures are in sterling terms, total return – that is, with any dividends reinvested. The graph represents five years' performance (or since inception, if five years is not available), to the date at the top of the document, and has been indexed to start at 100 (this aids comparison and is not a reflection of actual values at any given date). The discrete performance table is updated quarterly.

Gearing is calculated according to Association of Investment Companies (AIC) guidelines. The potential gearing figure reflects the amount of borrowings drawn expressed as a percentage of shareholders' funds. The invested gearing figure reflects the amount of borrowings at par less cash and cash equivalents actively invested, expressed as a percentage of shareholders' funds.

Active share, a measure of how actively a portfolio is managed, is the percentage of the portfolio that differs from its index. It is calculated by deducting from 100 the percentage of the portfolio that overlaps with the index. An active share of 100 indicates no overlap with the index and an active share of zero indicates a portfolio that tracks the index.

A negative cash position may sometimes occur due to obligations awaiting settlement.

Baillie Gifford & Co Limited's annual remuneration is (i) 0.70% of the first £100 million of market capitalisation; plus (ii) 0.65% of market capitalisation between £100 million and £250 million; plus (iii) 0.55% of market capitalisation in excess of £250 million. This is calculated and payable on a quarterly basis.

Further Information

This factsheet is issued by Baillie Gifford & Co (Financial Services Register 142597), Calton Square, 1 Greenside Row, Edinburgh EH1 3AN. Baillie Gifford group provides the following services to the Trust. Baillie Gifford & Co Limited (Financial Services Register 119179) is the manager and secretary of the Trust, and it delegates portfolio management to Baillie Gifford & Co. Both firms are authorised and regulated by the Financial Conduct Authority of 12 Endeavour Square, Stratford, London, E20 1JN.

Target Market

The Trust is suitable for all investors seeking a fund that aims to provide capital growth over a long-term investment horizon with a focus on delivering positive change by investing in companies addressing critical challenges in areas such as, but not limited to, education, social inclusion, healthcare and the environment. The investor should be prepared to bear losses. The Trust is compatible for mass market distribution. The Trust may not be suitable for investors who are concerned about short-term volatility and performance, seeking a regular source of income and investing for less than five years. The Trust does not offer capital protection.

Risk Warnings

The investment trusts managed by Baillie Gifford & Co Limited are listed UK companies. The value of their shares, and any income from them, can fall as well as rise and investors may not get back the amount invested. The specific risks associated with the Trust include:

- The Trust invests in overseas securities. Changes in the rates of exchange may also cause the value of your investment (and any income it may pay) to go down or up.
- The Trust invests in emerging markets where difficulties in dealing, settlement and custody could arise, resulting in a negative impact on the value of your investment.
- The Trust's risk could be increased by its investment in private companies. These assets may be more difficult to sell, so changes in their prices may be greater.
- The Trust can borrow money to make further investments (sometimes known as "gearing" or "leverage"). The risk is that when this money is repaid by the Trust, the value of the investments may not be enough to cover the borrowing and interest costs, and the Trust will make a loss. If the Trust's investments fall in value, any invested borrowings will increase the amount of this loss.
- Market values for securities which have become difficult to trade may not be readily available and there can be no assurance that any value assigned to such securities will accurately reflect the price the Trust might receive upon their sale.
- The Trust's risk is increased as it holds fewer investments than a typical investment trust and the effect of this, together with its long term approach to investment, could result in large movements in the share price.
- The Trust can make use of derivatives which may impact on its performance.
- The Trust invests in companies whose products or behaviour make a positive impact on society and/or the environment. This means the Trust will not invest in certain sectors and companies and the universe of investments available to the Trust will be more limited than other funds and trusts that do not apply such criteria. The Trust therefore may have different returns than a fund or trust which has no such restrictions.
- Share prices may either be below (at a discount) or above (at a premium) the net asset value (NAV). The Trust may issue new shares when the price is at a premium which will reduce the share price. Shares bought at a premium can therefore quickly lose value.
- The Trust can buy back its own shares. The risks from borrowing, referred to above, are increased when a trust buys back its own shares.
- The aim of the Trust is to achieve capital growth and it is unlikely that the Trust will provide a steady, or indeed any, income.
- The Trust is listed on the London Stock Exchange and is not authorised or regulated by the Financial Conduct Authority.
