

Royal London Short-Term Money Market Fund

Y Acc GBP

31 July 2025

Fund objective

The Fund's investment objective is to preserve capital and provide an income over rolling 12-month periods by predominantly investing (at least 80% of its assets) in cash and cash equivalents. The Fund's comparator benchmark is the Bank of England Sterling Overnight Interbank Average (SONIA). For the most appropriate comparison, this should be considered on a 'before the deduction of fees' basis. SONIA is the average overnight interest rate UK banks pay for unsecured transactions in sterling. It is considered to be an appropriate benchmark as it is a widely recognised approach to benchmarking short-term money market and fixed income funds.

Cumulative performance %

	Cumulative performance %					Annualised %	
	3M	6M	1Y	3Y	5Y	3Y	5Y

Share class	4.80	5.52	3.48	0.35	(0.03)

Rolling performance

Past performance is not a guarantee or reliable indicator of future returns. The value of investments and the income from them is not guaranteed and may go down as well as up and investors may not get back the amount originally invested. Share class performance is based on mid-day prices, net of fees and gross of taxes, with gross income reinvested unless otherwise stated. Benchmark performance is priced at close of business, gross of fees and taxes. The impact of commissions, fees and other charges can be material on the performance of your investment. Rolling performance data shown using month end returns.

Fund launch date	22 July 1999
Fund size	£9,606.96m
Fund type	ICVC
Fund domicile	GB
Fund managers	Tony Cole Adeline Derain Craig Inches
ISA eligible	Yes
Fund base currency	GBP
Share class currency	GBP
Share class launch date	26 November 2012
Benchmark	Sterling Overnight Index Average (SONIA)
SFDR classification	N/A
Settlement days	T+2
IA sector	Short Term Money Market
Weighted average life (days)	108.00
Weighted average maturity (days)	50.20
Fund management fee	0.100%
Minimum investment	£1,000,000
Mid price	£1.17
Yield to maturity	4.27%
ISIN	GB00B8XYYQ86
Sedol	B8XYYQ8

Risk and reward profile

The SRRI (Synthetic Risk and Reward Indicator) rating is a measure used to indicate the risk and reward profile of a fund. It is calculated using historical data (simulated data for share classes less than a year old) and may not be a reliable indication of the future risk profile of the fund. The SRRI rating shows how sharply the fund's share price has gone up and down historically. The lowest category does not mean 'risk free'.

Lead Fund Manager

Tony Cole
Senior Fund Manager
Tenure from: 22 May 2015

Deputy Fund Manager

Adeline Derain
Assistant Fund Manager
Tenure from: 26 February 2025

Deputy Fund Manager

Craig Inches
Head of Rates and Cash
Tenure from: 31 December 2015

Key concepts to understand

Money market instruments: Investments that pay interest, have a short duration and are designed to maintain a stable value.

Pricing: The Fund's price may swing to bid or offer to protect existing investors from the costs associated with buying or selling the fund's underlying assets when other investors are entering or leaving the fund. Performance is based on this pricing.

Ratings: Credit-rating agencies rate bonds based on the likelihood of them defaulting and being unable to repay their debt.

Reverse repurchase agreements: Agreeing to sell a purchased security at a specified later date.

Rolling 12 month period: A rolling 12 month period is any period of twelve months, no matter which day you start on.

Weighted average life: The weighted average of the remaining life (maturity) of each security held in a fund, meaning the time until the principal is repaid in full.

Weighted average maturity: The average length of time to maturity of all underlying securities in the fund weighted to reflect the relative holdings in each instrument, assuming that the maturity of a floating rate instrument is the time remaining until the next interest rate reset to the money market rate, rather than the time remaining before the principal value of the security must be repaid.

Yield to maturity: A bond's yield to maturity is the total expected return if it is held until its maturity date.

Fund risks

Counterparty risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Credit risk: Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

EPM techniques risk: The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Inflation risk: Where the income yield is lower than the rate of inflation, the real value of your investment will reduce over time.

Interest rate risk: Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital. Unlike the income from a single fixed interest security, the level of income (yield) from a fund is not fixed and may go up and down. Bond yields (and as a consequence bond prices) are determined by market perception as to the appropriate level of yields given the economic background.

Investment risk: The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Money market fund risks: A Money Market Fund is not a guaranteed investment, and is different from an investment in deposits. The principal invested in the Fund is capable of fluctuation and the risk of loss of the principal is to be borne by the investor. The Fund does not rely on external support for guaranteeing the liquidity of the Fund or stabilising the NAV per share.

Short Term Money Market Fund: The Fund has been authorised as a Variable Net Asset Value (VNAV) MMF and is a short term money market fund in accordance with MMF Regulation. The NAV is calculated using mark to market prices where possible otherwise mark to model prices are used. The redemption or issue of Shares will be undertaken at a price that is equal to the Net Asset Value per Share.

Share class fees and charges

Share class	ISIN	Fee	Minimum investment
Y Acc GBP	GB00B8XYYQ86	0.100%	£1,000,000
Y Inc GBP	GB00B3P2RZ52	0.100%	£1,000,000
