Capital Barrier	50%	**Capital Barrier Type**	Observed on the Final Observation Date only
Early Redemption Barrier	100%	**Early Redemption Return**	2.625%
Final Barrier	100%	**Final Return**	105%

Underlying

Reference Underlying	Identifier	Index Sponsor	Currency
FTSE 100 Equally Weighted 45 Point Decrement Index	UKEWD45	Financial Times and London Stock Exchange	GBP

FTSE 100 Equally Weighted 45 Point Decrement Index is an index where all dividends paid by its constituent stocks are reinvested and a fixed and steady deduction is applied. If the actual dividends paid are lower than (or higher than) this deduction, the net result will have a negative (or positive) impact on the performance of the index, compared to an index where the dividends are not reinvested. By looking at the deduction on its own, the significance of this deduction increases if the value of the index falls. This means that the deduction will represent a larger proportion of the index value if the index falls. Conversely, the deduction will represent a smaller proportion of the index value if the index rises.

The Index is exposed to foreign exchange risk because the prices of components quoted in currencies other than GBP are converted into GBP for the calculation of the Index. As a result, the performance of the Index may be significantly impacted, positively or negatively, by changes in the exchange rates of the component currencies relative to GBP.

Type

This product is an unsecured debt instrument governed by English law. This product tracks the value of a Preference Share issued by Mapleis which is linked to the Underlying.

Objectives

This product is designed to provide a return when the product is redeemed (either at maturity or when redeemed early). It is possible for the product to be automatically redeemed early based on pre-defined conditions. If the product is not redeemed early, both the return and the capital redemption amount will be linked to the performance of the Reference Underlying. Your capital will be fully at risk when investing in this product.

Automatic Early Redemption

On any Early Redemption Observation Date, if the Level of the Reference Underlying is at or above the Early Redemption Barrier, the product will be redeemed early and you will receive, on the Early Redemption Payment Date:

100% of the Nominal Value, plus the Early Redemption Return multiplied by the number of periods the product has elapsed since inception.

A standard period corresponds to three months. The first or the last period could be either shorter or longer, please refer to the calendar table for more details.

Final Redemption

On the Maturity Date, provided that the product has not been redeemed early, you will receive a final redemption amount.

- If the Final Level of the Reference Underlying is at or above the Final Barrier, you will receive:

100% of the Nominal Value plus the Final Return

- If the Final Level of the Reference Underlying is below the Final Barrier and the Final Level of the Reference Underlying is at or above the Capital Barrier, you will receive:

100% of the Nominal Value.

- Otherwise, you will receive the Final Level of the Reference Underlying multiplied by the Nominal Value. In this scenario, you will suffer a partial or total loss of your invested amount.

Additional Information

- The Level of the Reference Underlying corresponds to its value expressed as a percentage of its Initial Value.
- The Initial Value of the Reference Underlying is its value observed on the Initial Observation Date.
- The Final Level is the level of the Reference Underlying observed on the Final Observation Date.
- Return is expressed as a percentage of the Nominal Value.
- Extraordinary events may lead to changes to the product's terms or the early termination of the product and could result in losses on your investment.
- The product is available through a public offering during the applicable offering period in the following jurisdiction(s): United Kingdom

Intended Retail Investor

The product is aimed at investors who:

- Have specific knowledge or experience of investing in similar products and in financial markets, and have the ability to understand the product and its risks and rewards.
- Seek a product offering capital growth and have an investment horizon in line with the recommended holding period stated below.
- Are able to bear total loss of their investment and accept the risk that the Issuer and / or Guarantor could fail to pay the capital and any potential return.
- Are willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Summary Risk Indicator

Lower risk 1 2 3 **4** 5 6 7 Higher risk

The risk indicator assumes you keep the product for 9 years 11 months 24 days.
The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions are very unlikely to impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Investment Performance Information

Factors affecting the product performance

The main factors that could affect the performance of the product is the performance of the underlying instrument(s) along with Société Générale (the Guarantor) creditworthiness, which could have a material impact on the return, for instance if Société Générale (the Guarantor) is unable to pay out the redemption amount.

Some other factors (such as the remaining time to the redemption date, interest rates, exchange rates, credit spreads, the dividend yield of the underlying where applicable, and in the case of multiple underlyings, the correlation between the various underlyings) could also affect the overall performance of the product on the secondary market.

There is no relevant index, benchmark or proxy which historical performance can be compared to the potential future performance of this structured product.

What could affect my returns?

The potential yield of the product at maturity will depend, in particular, on the scenario of evolution, until maturity of the product, of the factors that may affect its performance, mentioned above.

In a favorable scenario, if you hold the product to maturity or, (where applicable) until it early redeems, you might expect a return of 9.61% per annum.

In a moderate scenario, you might expect a return of 9.61% per annum.

In an unfavorable scenario, you will lose money. You might expect a return of 0.00% per annum based on an estimate of future performance. This case occurs (i) when the underlying performs negatively, i.e. falls compared to its reference level in the product or (ii) when the underlying falls below the Capital protection barrier.

For the three scenarios above, if the manufacturer is not able to meet its obligation, you will have a negative return and could lose the entire initial amount.

Outcomes in severely adverse market conditions

In severely adverse market conditions, the product may undergo major price movements until its maturity which, in the worst case scenario, may cause its value at maturity falling to 0 .
If the product incorporates a leverage effect the variation of its price will be amplified and a price drop strongly accelerated .
At maturity of the product you may have lost the entire initial amount you invested in the product if the underlying asset of the product has suffered a sharp decline in its value until this date.

All expected return figures presented in this section result from statistical calculations in accordance with the methodology prescribed under the PRIIP Regulation. They do not represent the return you will receive in each scenario but only a probability of return.

WHAT HAPPENS IF SOCIÉTÉ GÉNÉRALE IS UNABLE TO PAY OUT?

If the Issuer defaults you may only claim any unpaid amount from Société Générale (the Guarantor). Should Société Générale default or file for bankruptcy, you may suffer a partial or total loss of the invested amount. If the Issuer and/or the Guarantor becomes subject to resolution measures in the form of the bail-in tool ("bail-in"), your claim may be reduced to zero, converted into equity or its maturity may be postponed. Please be aware that your Investment is not covered by any investor compensation or guarantee scheme.

Please find the ratings of Société Générale at https://investors.societegenerale.com/en/financial-non-financial-information/ratings/credit-ratings.

WHAT ARE THE COSTS?

Costs over Time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment GBP 10,000.00

Scenarios	If you cash in after 1 year	If you cash in after 5 years	If you cash in at the end of the Recommended Holding Period
Total costs	GBP 221.00	GBP 206.00	GBP 206.00
Impact on return (RIY) per year	2.21%	0.33%	0.16%

Composition of Costs

The table below shows:
- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

This table shows the impact on return per year

One-off costs	Entry costs	0.16%	The impact of the costs you pay when entering your investment. The impact of the costs already included in the price.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
Ongoing costs taken each year	Portfolio transaction costs	0.00%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	0.00%	The impact of the costs that we take each year for managing your investments and the costs presented in Section II.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended Holding Period: 9 years 11 months 24 days, which corresponds to the product maturity.

Under normal market conditions, Société Générale or an entity of its group ensures a daily secondary market during the life of the product by providing bid and offer prices expressed as percentages of the Nominal Value and the difference between the bid and offer prices (the spread) will not be more than 1.00% of the Nominal Value. If you want to sell the product before the Maturity Date, the price of the product will depend on market parameters at the time you wish to sell and you may sustain a partial or total capital loss. In unusual market condition, the resale of the product may be temporarily or permanently suspended.

HOW CAN I COMPLAIN?

Any complaint regarding the person advising on, or selling, the product can be submitted directly to that person. Any complaint regarding the product or the conduct of the product manufacturer can be submitted to Société Générale at the following address: SOCIETE GENERALE, Regulatory Information Department, 17 cours Valmy, 92987 PARIS LA DEFENSE CEDEX, FRANCE - SG-complaints-kid@sgcib.com (http://kid.sgmarkets.com).
